

# JW Clark Guide to downloading Wastewater Asset Plans for Severn Trent & Anglian Water

Go to [www.utilities.digdat.co.uk](http://www.utilities.digdat.co.uk)

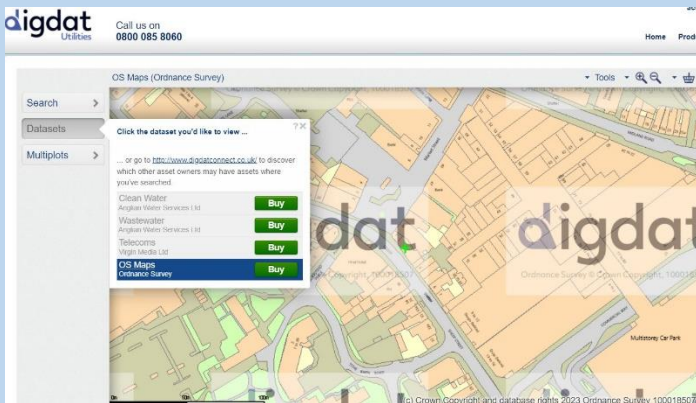

At the top of the page, on the far right-hand side click 'login'. Or 'Register' if you haven't done so before – only takes 2 minutes! Click 'Maps' at the top right hand side

Enter the site address, or if this is a new site then enter the nearest address

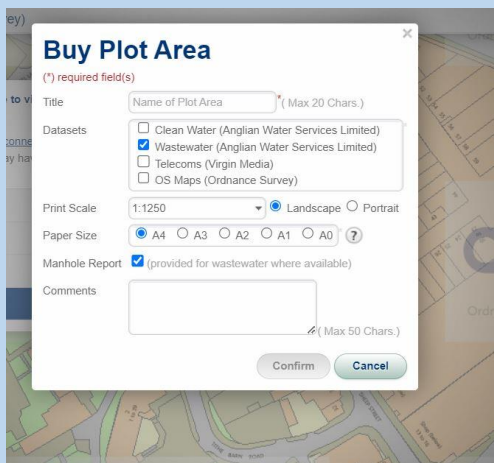

Click search and click on the relevant address that comes up below, to continue

On the map that comes up, make sure your site is within the area displayed.

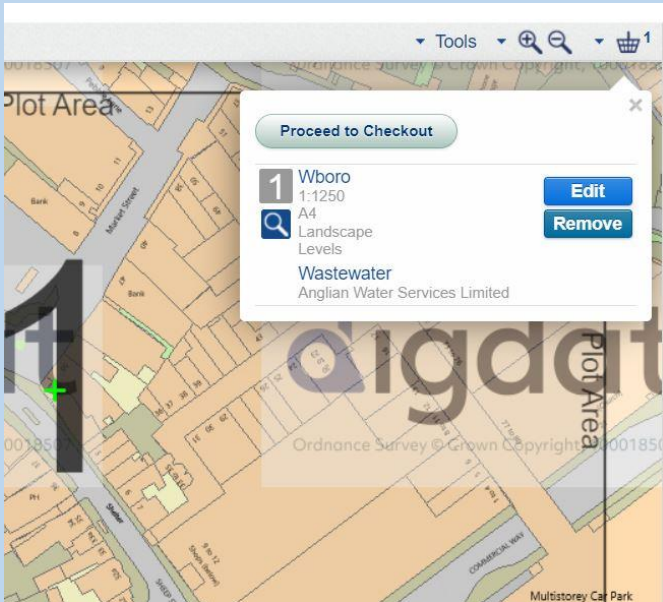

You will now have 3 or 4 options to buy different products, depending on location

Click 'Buy' in the green box next to the 'Wastewater' option

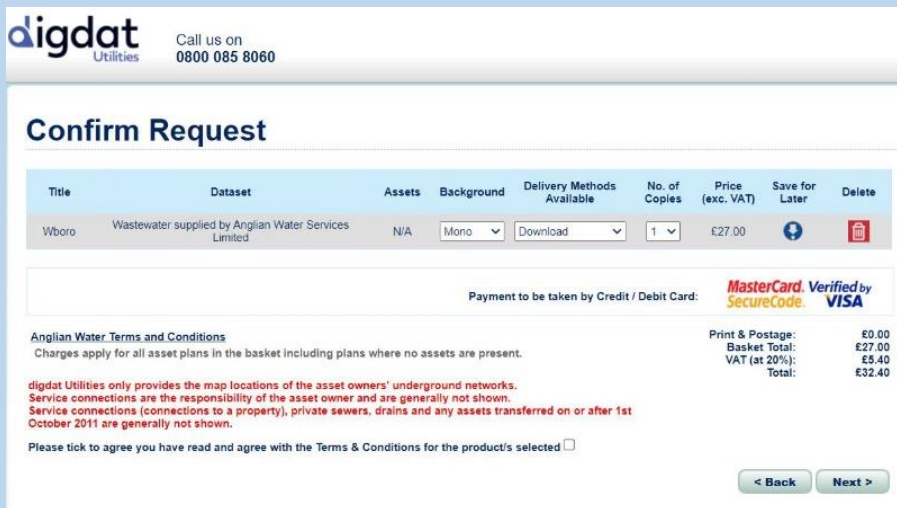

In the first field named 'Title', enter the name of the plot – this is just for your own reference. Further down next to Manhole Report make sure this box is ticked! (Please note that some customers may wish to also purchase the Clean Water drawing – although we will never need this ourselves to quote for your sewer connection)

Click 'confirm' at the bottom to continue

Click 'Proceed to Checkout'

Click the little box at the bottom to agree to Ts & Cs, and then click Next at the bottom right

Enter payment details on the final page and you're done! The drawing should be delivered to the email address you entered when you first registered. Page 1 will normally be a drawing showing the various assets in that area, foul water and surface water. On page 2 you may or may not have some helpful information showing the depths of manholes etc. In any case, this is the drawing we need! Please email us this drawing for us to be able to quote for your sewer connection. If you struggle with any of the above, please let us know and we'll help you as best we can.
